

THOMAS CHACRA

Environmental Bioengineer | Environmental Aspects and Performance Analyst

Environmental Bioengineer with consulting experience in data reconciliation, environmental performance indicators, and automated reporting. Highly proficient in Excel, Power BI, Power Query and experienced with Python, and SQL. Bilingual in French and English, I am ready to contribute to and grow within a global environmental services leader like Veolia.

PROFESSIONAL EXPERIENCE

Sustainability Adviser — **Green Stems Products**
Sept. 2026 – Present
Compostable packaging and sustainable supply chains

- Structure environmental data to support performance assessment and identify improvement opportunities.
- Developed a dynamic carbon assessment tool (cradle to grave, ISO 14067) covering manufacturing emissions and international transportation from Kenya to potential clients.

ESG & Sustainability Analyst — **BetterBusiness**
Dec. 2025 – May 2026
Environmental and sustainability consulting, Brussels

- Calculated carbon footprints using the GHG Protocol and developed environmental performance indicators and monitoring KPIs.
- Designed Power BI dashboards to consolidate sustainability and environmental data and support management decision-making.
- Gained exposure to ISO 9001 audit practices and ISO 14001 and ISO 45001 management system requirements.

Research and Development Scientist — **Vertiberry**
Sept. 2024 – Sept. 2025
AgTech and innovative hydroponic production, Brussels

- Analyzed environmental time-series data to identify trends and optimize crop productivity and energy efficiency.
- Developed performance indicators and supported process optimization through structured data analysis.

Energy and Environmental Consultant — **Deplasse et Associés**
June 2024 – August 2024
Energy engineering and technical consultancy, Brussels

- Contributed to technical and economic feasibility studies for low-carbon energy systems, including geothermal energy, hydrothermal systems, and biowaste recovery.

Botaniste — **Vertiberry**
Nov. 2021 – May 2022
AgTech and innovative hydroponic production, Brussels

- Conducted plant growth experiments and analyzed results to assess performance under different environmental conditions.

Relative Skills

Compliance : Familiarity with ISO 14001, ISO 9001, ISO 50001, environmental assessments, and sustainability reporting.
Climat & Carbone : Carbon footprint calculations, GHG Protocol, CSRD, ESRS, EU Taxonomy, and climate risk assessment, ISO 14067

IT & Data Analytics

Power BI, Excel / Power Query , SQL, Python, Power Automate

Soft skills

- Analytical Mindset
- Results oriented
- Team player

Formation

M.Sc. in Environmental Bioengineering
Université libre de Bruxelles (ULB)
B.Sc. in Engineering Sciences
Université libre de Bruxelles (ULB)

Languages

French	Bilingual
English	Bilingual
Dutch	In Progress
